

## Chapter Three – Viscoelasticity

- 3.1 Introduction
- 3.2 Molecular Weight Distribution
- 3.3 Glassy, Plateau and Terminal Zones
  - 3.3.1 Effects of Cross Linking, Entanglements, and Crystallinity
  - 3.3.2 Rubber as an Entropy Spring
- 3.4 Stress and Strain Tensors for Simple Shear
- 3.5 Stress Relaxation Following Changes in Steady Shear Flow
- 3.6 Creep Compliance and Steady State Compliance
  - 3.6.1 Effect of Molecular Weight Distribution
- 3.7 Compressive Deformations
- 3.8 Tensile Deformations
- 3.9 Normal Stress Differences
- 3.10 Non-Newtonian Viscosity
- 3.11 Relaxation and Retardation Spectra and Their Relationships
  - 3.11.1 Useful Approximations
- 3.12 Nonlinear Viscoelasticity
